SUMMARY

- Full Stack Developer skilled in Java, Spring Boot, React.js, and MySQL, with practical experience in developing RESTful APIs, secure backend systems, and responsive web applications. Passionate about clean architecture, efficient database design, and delivering reliable, scalable solutions.

TECHNICAL SKILLS

Languages: Java (Core & Advanced), C++, JavaScript, HTML5/CSS3.
Frameworks: Spring Boot (REST, Data JPA, Security, Microservices), React.js.
Databases: SQL (Schema Design, CRUD, Joins).
Tools/Testing: Git, VS Code, IntelliJ IDEA, Postman API Testing.
Concurrency: Java Multi-threading, Task Management, Synchronization.

SOFT SKILLS

Adaptability : Quick to adapt to new technologies, tools, and changing project requirements.
Problem-Solving: Strong problem-solving skills with a logical and analytical approach.
Leadership : Demonstrated leadership through team coordination and task ownership.
Troubleshooting: Efficient in identifying, debugging, and resolving technical issues across the stack.
Agile Methodology: Familiar with Agile methodology and collaborative, iterative development practices.

EXPERIENCE

Student Micro Loan System | Associate Backend Developer Intern March 2026 – Present
CodeTikki

- Designed backend microservices for a student micro-loan platform serving students and interns within the CodeTikki ecosystem.
- Built a phased disbursement system — Phase 1: Wallet Credit (live), Phase 2: UPI Transfer (planned) — ensuring regulatory compliance and low operational risk.
- Engineered an eligibility credit evaluation engine using platform activity data (quiz scores, streaks, engagement) as a proxy for creditworthiness, replacing traditional CIBIL scores.
- Implemented a rule-based Decision Engine classifying loan applications as Approved, Partially Approved, or Rejected based on dynamic risk profiles.
- Developed a full repayment lifecycle (Active → Due → Overdue → Closed) with automated reminders, late-fee penalties, and fraud detection (duplicate accounts, suspicious activity flags).

PROJECTS

Feast and Fête: Full-Stack Event Catering Platform | Web Full Stack Development May-2026

- Developed a full-stack catering booking platform using Spring Boot Microservices, React.js, and MySQL.
- Implemented secure JWT-based authentication and role-based access control for Admin, Organizer, and Customer modules.
- Built organizer profile management, food gallery management, and catering booking functionalities with Cloudinary integration.
- Integrated Razorpay Payment Gateway for online payments and payment status tracking.
- Developed responsive React.js interfaces and scalable REST APIs with Spring Boot and MySQL.
- Deployed the frontend on Vercel and backend services on Render, with API testing performed using Postman.
- Tech Stack: Java, Spring Boot, Microservices, Spring Security, JWT, React.js, MySQL, Razorpay, Cloudinary, REST APIs.
